

GSFC Earth Sciences Distributed Active Archive Center (GES DAAC)

**Gary Alcott, Steve Kempner, Greg Leptoukh, Chris Lynnes,
Long Pham, Peter Smith, Bruce Vollmer, Gail Wade**

Presentation Purpose

To Discuss:

What is the GES DAAC?

What does the GES DAAC do?

Note:

The GES DAAC includes activities directly funded by ESDIS Project
(e.g, EOS missions)

The GES Data and Information Services Center (DISC) includes DAAC
activities, plus those not directly funded by the ESDIS Project (e.g.,
ACCESS proposals)

This UWG will address DAAC activities.

GES DAAC Mission

The GES DAACs mission is to maximize NASA's investment benefit by providing data and services that enable people to fully realize the scientific and educational potential of global climate data.

In Short...

The GES DAACs mission is to:
ENABLE EARTH SCIENCE

Summary of Expertise

- **Software engineering** - *In-house expertise and experience that understands the best advanced technologies to further mature data management system usability and efficiency*
- **Science data management expertise** – *Doctorate-level scientists in interdisciplinary Earth sciences who collaborate with researchers to develop sophisticated Web-based tools to facilitate comprehensive information management, access, analysis and visualization*
- **Mission Support** - *In-house expertise who understands the requirements for costing and sizing information management systems for new or existing missions*
- **Operational active archive and distribution system with complete user services** - *8 X5 (24 X 7 on call) staff that understands the importance of, and ensures, continuous data ingest, processing, archive and distribution*

Missions Supported

Atmospheric Composition

Total Ozone Mapping Spectrometer (TOMS)
Upper Atmosphere Research Satellite (UARS)
Solar Radiation and Climate Experiment (SORCE)
Aura: Ozone Monitoring Instrument (OMI), High Resolution Dynamics Infrared Sounder (HIRDLS), Microwave Limb Sounder (MLS)
Soon: GLORY: Aerosol Polarimetry Sensor (APS), Total Irradiance Monitor (TIM), Cloud Camera

Atmospheric Dynamics

TIROS Operational Vertical Sounder (TOVS)
Aqua Atmospheric Infrared Sounder (AIRS)

Modeling

Data Assimilation Office (DAO), Global Modeling Assimilation Office (GMAO)
Land Data Assimilation System (LDAS)

Precipitation

Tropical Rainfall Measuring Mission (TRMM)
Hydrology Data Collections

Previously missions supported

Terra and Aqua: Moderate Resolution Imaging Spectroradiometer (MODIS)
Coastal Zone Color Scanner (CZCS); Sea-viewing Wide-field-of-view Sensor (SeaWiFS)

Then .. And Now

(Does not include non-EOSDIS funding)

	2000	2004	2009
EOSDIS funding (\$K)	5,553	13,301	7,435
EOSDIS FTEs	CS = 10 Contractor = 51	CS = 9 Contractor = 103	CS = 8 Contractor = 49
Vol (TB)	100	1700	250 (single copy), 400 (total)
Instruments	CZCS, TOMS, TOVS, DAO, AVHRR, UARS, SeaWIFS, TRMM, Terra (MODIS)	CZCS, TOMS, TOVS, DAO, UARS, SeaWIFS, TRMM, Terra (MODIS), Aqua (MODIS,AIRS), SORCE, Aura (OMI, HIRDLS, MLS)	TOMS, TOVS, GMAO, UARS, TRMM, Aqua (AIRS), SORCE, Aura (OMI, HIRDLS, MLS), LDAS, A-Train subsetting datasets, Hurricane data (TRMM, QuikScat)
Main Services	Subsetting, Data Ordering, S4P	Subsetting, Subsampling, Data Ordering, Data Mining, S4PM, TOVAS	Subsetting, Subsampling, Data Ordering, Data Mining, S4PM, S4PA, Giovanni, Mirador, Data Fusion, Multi-Sensor Data Co-Registration
Archive Type	Near-line tape, Disk	Near-line tape, Disk	Disk
Systems	Version 0, Version 1, ECS	S4PA, ECS	S4PA

EOSDIS Evolution at the GES DAAC: 2006-2007

Pre-Evolution System Characteristics - ECS based	Evolved System Characteristics - S4PA based
Generalized interface(s)	Discipline-specific interfaces in addition to generalized interface(s)
Tape archive <ul style="list-style-type: none">- All products archived- Order data for delivery	Disk archive <ul style="list-style-type: none">- Some products processed on demand (virtual products)- Download data automatically upon choosing
Search and order tools	Tools to find, explore, and analyze data
Distribute standard products	Distribute lower volume tailored products
System changes require long lead time	System changes implemented quickly according to priority within given budget cap
Steward data	Steward data

Distribution Public Users (Distinct IPs per day)

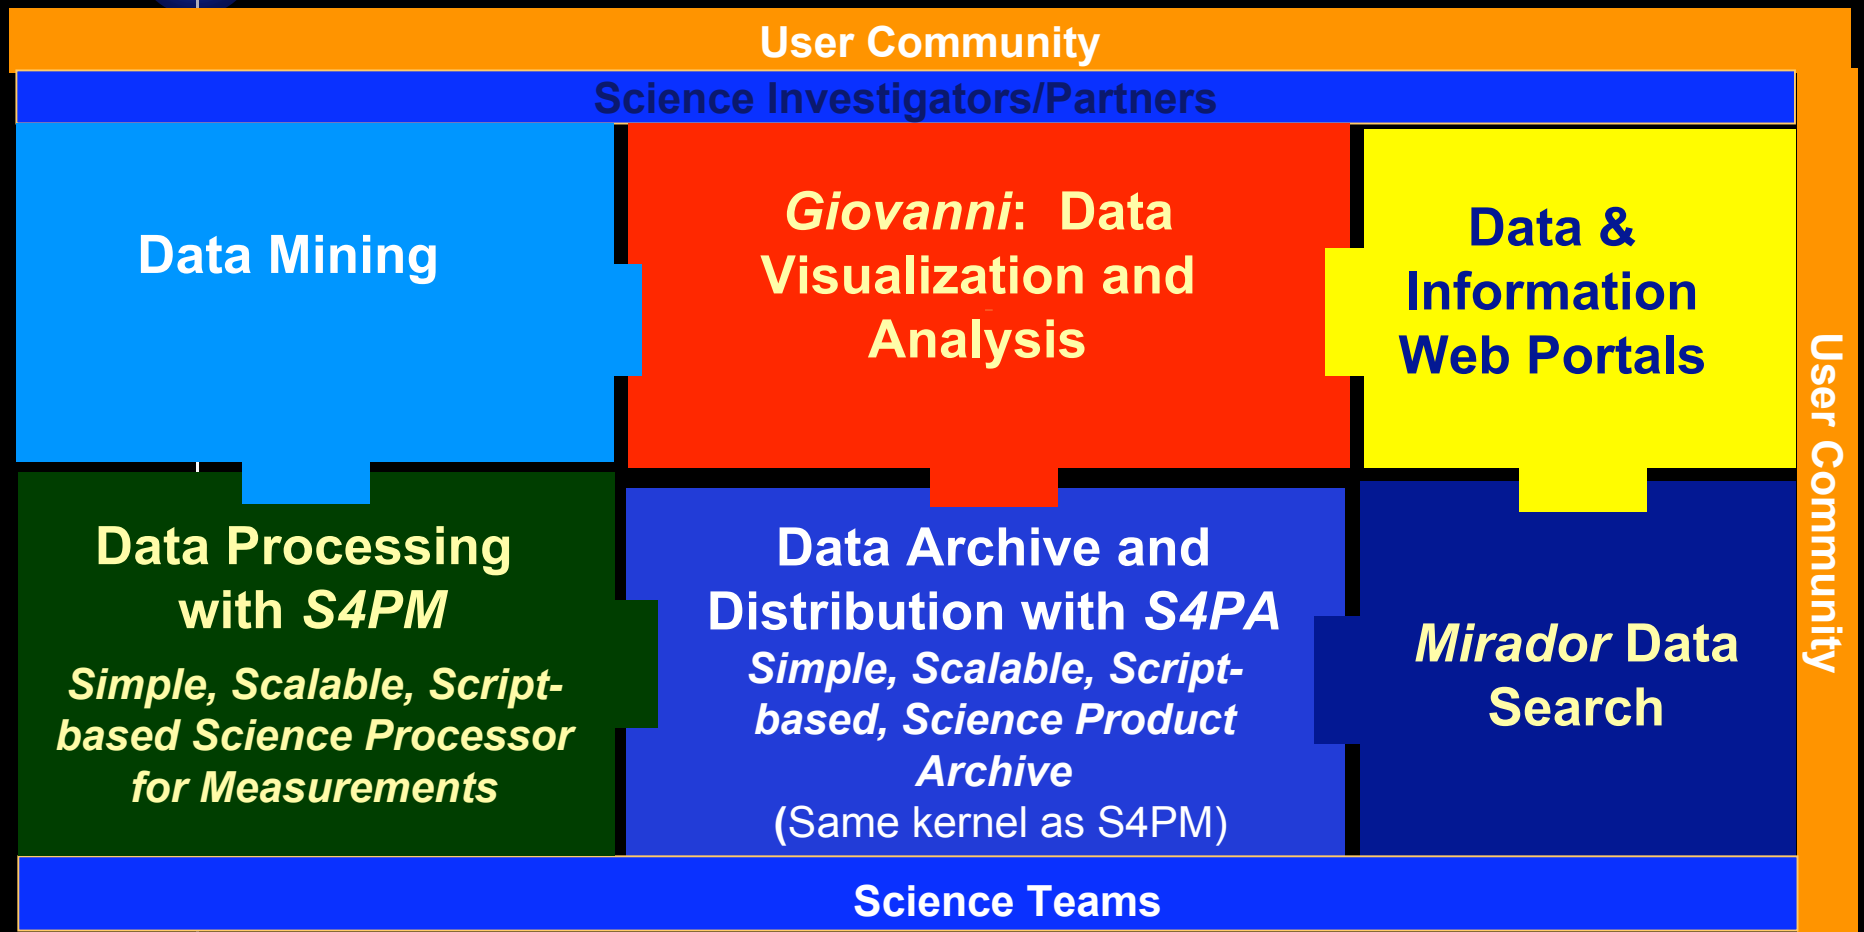

Distribution Granules via FTP (per day)

GES DAAC Core Components

Data Archive and Distribution with S4PA

MERRA

Simple, Scalable, Script-based, Science Product Archive

- Radically simplified architecture for archive and distribution
- Features

- Public and restricted-access
- Subscriptions
- Automated data integrity checking

TRMM

Interfaces to:

- S4PM processing system
- Science Investigator Processing Systems (SIPS)
- EOS Data Operations (EDOS)
- Mirador search tool
- Giovanni
- Global Change Master Directory
- EOS Clearinghouse

SORCE

GSFC
Hydrology

Aqua AIRS

OMI, MLS
HIRDLS

A-Train
Data Depot

Data Processing with S4PM

Simple, Scalable, Script-based Science Processor for Measurements

- In-house developed open-source software
- Runs all data processing at the GES DISC since 2002
- Near-real-time processing: AIRS, MLS/Aura (in progress)
- Reused by LaRC for CALIPSO, FlashFlux, MISR, EDC for ASTER On-Demand

<http://s4pm.sci.gsfc.nasa.gov>

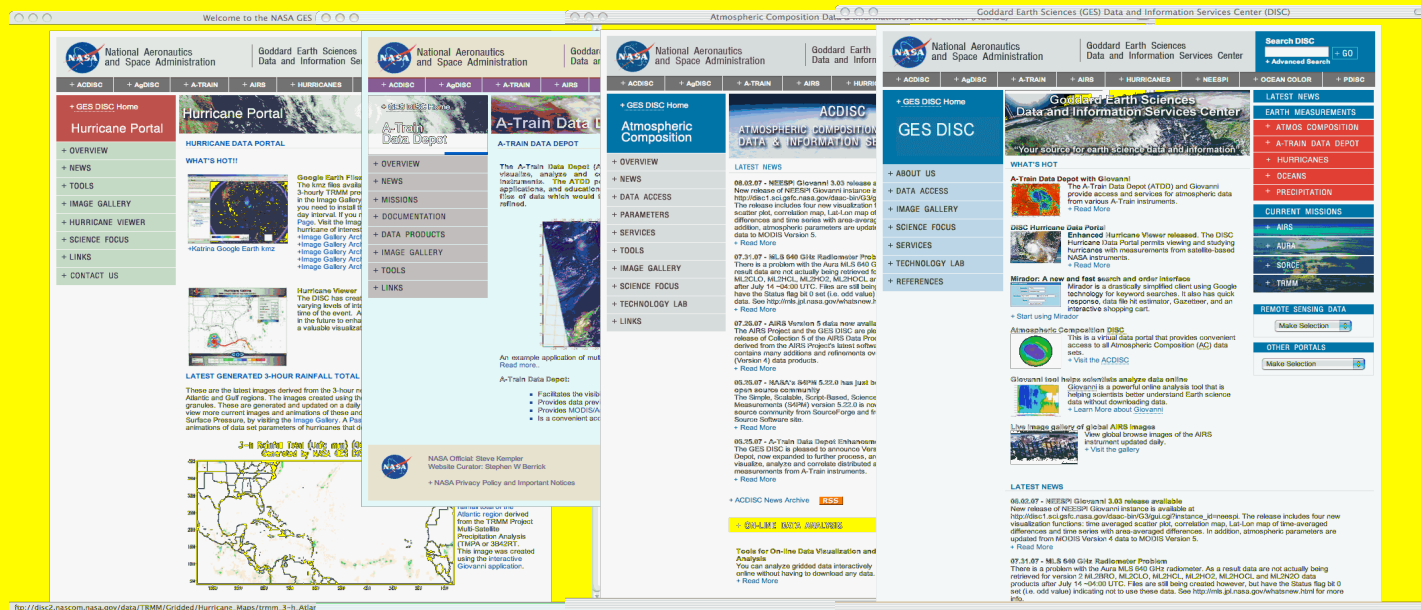

Data & Information Web Portals

Community and project based portals
Accessible from <http://disc.gsfc.nasa.gov>
Tailored to the users being served

- Multi-mission science research
- Discipline specific portals
- Remote data access

Mirador Data Search

- <http://mirador.gsfc.nasa.gov>
- Based on Google
- Fast, easy to use
- Gazetteers for places and events
- Can support portals
- Also available as Web Service

MIRADOR 1.8

Mirador is a simplified interface for searching, browsing, and ordering Earth science data at NASA Goddard Earth Sciences Data and Information Services Center (GES DISC). Designed to be fast and easy to learn, this is version 1.8, so we welcome feedback from the user community.

Data Sets Results 1 - 5 of 5 for AIRS water vapor (1 seconds)

For location, did you mean ...

Chesapeake and Ohio Canal National Historical Park, park, (Washington, Maryland, USA)	Chesapeake Beach, populated place, (Calvert, Maryland, USA)
Chesapeake Brook, stream, (Western Australia Australia)	Chesapeake, lake, (Chesapeake city), Virginia, USA
Chesapeake and Delaware Canal, canal, (New Castle, Delaware, USA)	Great Dismal Swamp National Wildlife Refuge, park, (Chesapeake city), Virginia, USA
Chesapeake Arroyo, farm, (Free State, South Africa)	Chesapeake Bay, bay, (Calvert, Maryland, USA)
Chesapeake City, populated place, (Cecil, Maryland, USA)	Chesapeake Canyon, canyon, (Undersea Features)

☐ **AIRS/Aqua Level 3 monthly standard physical retrieval product (Without HSB) (AIRX3STM)**
Approx. 2 files found (117.47 MB)
Parameters: TROPOPAUSE, OZONE, SURFACE PRESSURE, AIR TEMPERATURE, SKIN TEMPERATURE, SURFACE AIR TEMPERATURE, SEA SURFACE TEMPERATURE...
Spatial Resolution: 1 x 1 deg x 1 x 1 deg
Temporal Resolution: 30 Days(s)

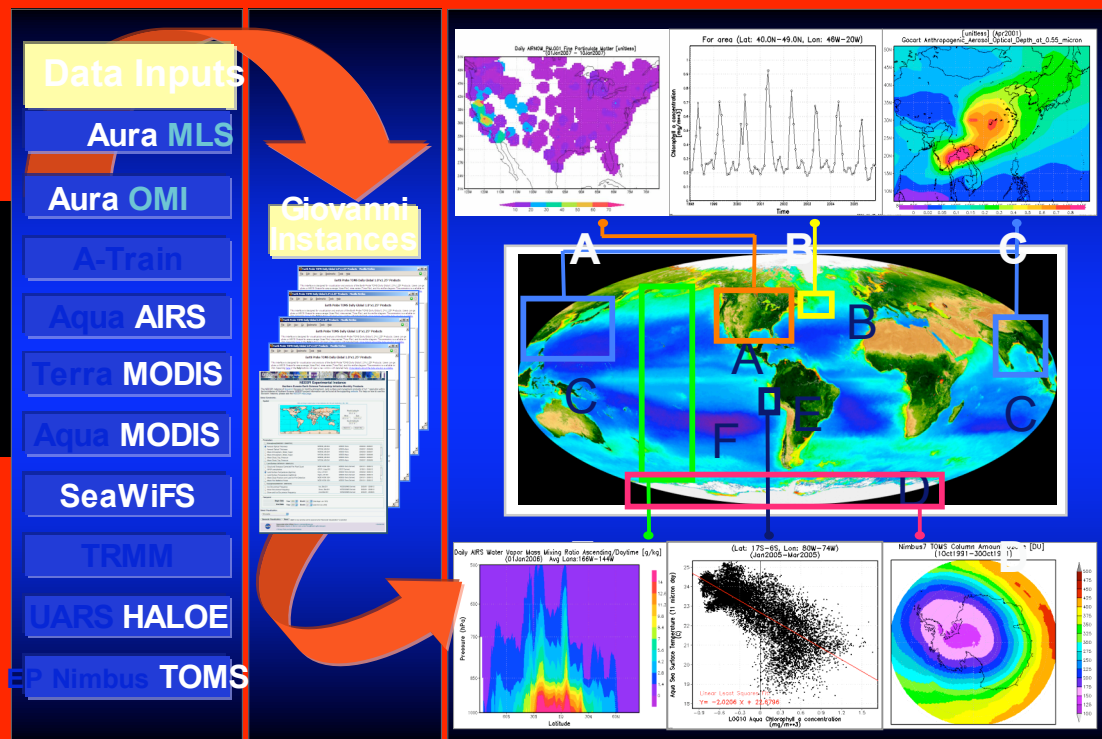

☐ **AIRS/Aqua Level 3 multiday standard physical retrieval product (Without HSB) (AIRX3STR)**
Approx. 8 files found (467.15 MB)
Parameters: Cloud Vertical Distribution, Surface Pressure, Ozone, Sea Surface Temperature, Emissivity, Reflectance, Skin Temperature...
Spatial Resolution: 1 deg x 1 deg
Temporal Resolution: 8 Days(s)

☐ **AIRS/Aqua Level 3 daily standard physical retrieval product (Without HSB) (AIRX3STD)**
Approx. 61 files found (2.37 GB)
Parameters: Cloud Vertical Distribution, Surface Pressure, Ozone, Sea Surface Temperature, Emissivity, Reflectance, Skin Temperature...
Spatial Resolution: 1 deg x 1 deg
Temporal Resolution: 1 Days(s)

☐ **AIRS/Aqua Level 2 Support Product (Without HSB) (AIRX2SUP)**
Approx. 165 files found (3.69 GB)
Parameters: Outgoing Longwave Radiation, Precipitation Rate, Surface Pressure, Methane, Carbon Dioxide, Carbon Monoxide, Surface Air Temperature...
Spatial Resolution: 50km x 50km
Temporal Resolution: Twice per day (daytime and nighttime)

☐ **AIRS/Aqua FINAL Level 2 Products (Without HSB) (AIRX2RET)**
Approx. 165 files found (847.77 MB)
Parameters: Cloud Vertical Distribution, Surface Pressure, Ozone, Sea Surface Temperature, Emissivity, Reflectance, Skin Temperature...
Spatial Resolution: 50 km x 50 km
Temporal Resolution: Twice per day (daytime and nighttime)

Giovanni: Data Visualization and Analysis

<http://giovanni.gsfc.nasa.gov>

- Data from multiple sensors
- Single- and multi-parameter statistics
- Multiple output formats and protocols
 - JPEG and PNG
 - WMS
 - HDF
 - netCDF
 - ASCII
 - KML for Google Earth
- Multiple input formats & protocols
 - HDF4 and HDF5
 - OPeNDAP
 - WCS
- Web Services (including SciFlo)
- Standard FTP
- Data lineage support (in development)

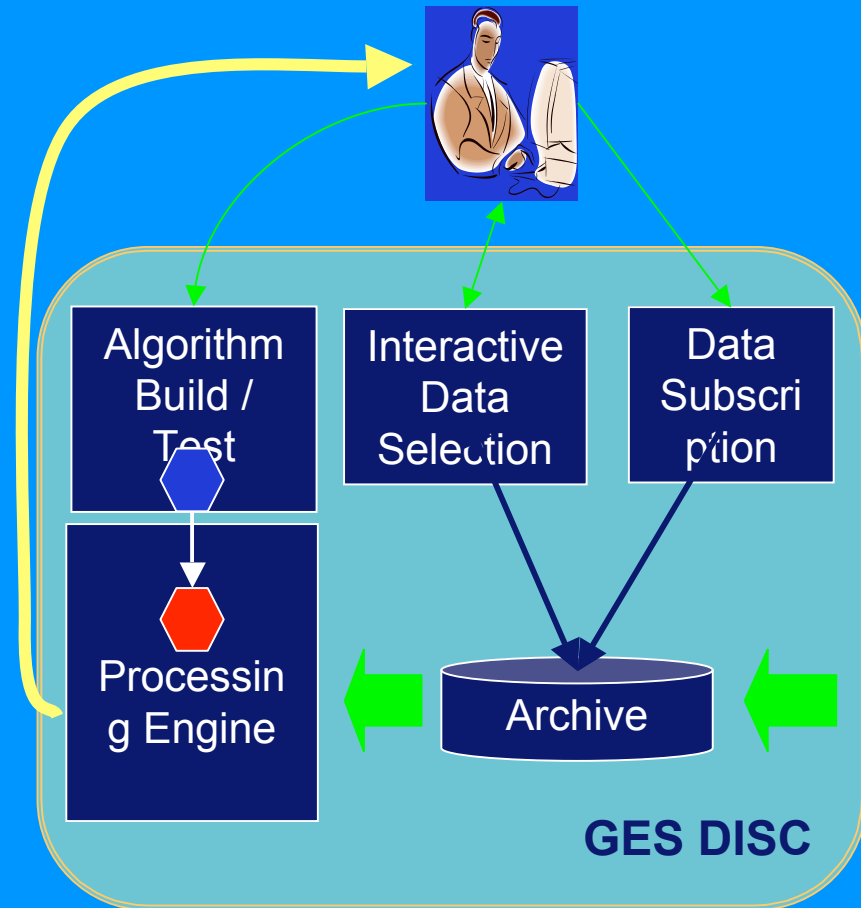

Data Mining

Data mining services available in S4PM

- Users submit and execute data mining algorithms
- Simple Web interface
- Subscriptions process new data as they arrive
- Mining results are made available to user via FTP

Coming Soon: Mining Web Services

- ADaM mining algorithms from Univ. Alabama-Huntsville
- Invoked via Web Services interface

Data System Evolution Overview

EOSDIS Evolution at the GES DAAC: 2009 – 2013

Evolved System Characteristics - S4PA based	Evolved System Characteristics - S4PA based initially
Discipline-specific interfaces in addition to generalized interface(s)	Discipline-specific, multi-mission, services oriented interfaces in addition to generalized interface(s)
Disk archive <ul style="list-style-type: none">- Some products processed on demand (virtual products)- Download data automatically	Disk archive <ul style="list-style-type: none">- Access provided to all products archived locally and remotely- Download data automatically upon choosing
Tools to find, explore, and analyze data	Web-based tools to provide for comprehensive discovery, access, visualization and analysis of coherently related Earth science datasets (satellite, ground-based and model output) to enable interdisciplinary Earth science research
Distribute lower volume tailored products	<ul style="list-style-type: none">- Distribute lower volume tailored products- Broker hard to get data
System changes implemented quickly according to priority	System changes implemented quickly according to priority within given budget cap
Steward data	Steward data

Challenges

- How can GES DISC tools be reused for new missions to reduce mission costs, while providing the flexible system needed to facilitate science?
- How can GES DISC expertise be utilized in the formulation of new missions?
- Are the GES DISC work directions consistent with the objectives of the NASA Earth science program and its research communities?
- Are the GES DISC work directions consistent with the objectives of the NASA Earth science program and its research communities?
- How much effort should the GES DISC expend on Earth science applications and application research?
- Integrating information services as a commodity item in the science community.

BACKUP SLIDES

Definitions

- **Data Center** - Ingests, processes, archives, distributes, and manages data acquired from remote sensing instruments. Data “has no significance beyond its existence” *
- **Information Center** - Ingests, processes, archives, distributes, and manages value-added data products, and value-added data processes. “Data that has been given meaning by way of relational connection” *
- **Knowledge Center** (not yet) - “Knowledge is the appropriate collection of information, such that its intent is to be useful” *
- **Data and Information Services Center** - Provides tools that further the use and usefulness of data and information

Each further enables researchers to do their work: Science
